

Supporting your Child's Mathematical Development

9:00 – 10:00am Wednesday 21st 2018

We are pleased to be offering a workshop, designed for Year 3, 4, 5 and 6 parents, to support the development of your child's mathematical skills at school and at home.

In this session, we aim to:

- 📖 Share how certain areas of Mathematics is taught at Merryhills, including:
 - The four operations- multiplication, division, addition and subtraction
 - The importance of language in Mathematics
 - The use of multiplication tables

- 📖 Provide strategies for supporting Mathematics at home, including:
 - Ideas for learning multiplication tables
 - Useful websites
 - How to ask relevant questions

The sessions are not for children and we would ask you to please make alternative child care arrangements for any child who will not already be at school.

Please wait at the Year 1 entrance where you will need to sign in and be met by a member of staff.

We look forward to seeing you.
